3. Quality Criteria

For the purposes of the quality framework, high quality care has been defined as the presence of three dimensions:

- Care that is clinically effective
- Care that is safe
- Care that provides a positive experience for patients

The Quality Payments Scheme rewards community pharmacies for delivering quality criteria across all three dimensions of quality.

The table (next page), which has been reproduced from “Pharmacy Quality Payments: Quality Criteria Guidance” (NHS England, February 2017), summarises the criteria by domain and indicates the number of points allocated to each criterion.

Pharmacies may choose which of the elements they work towards and claim payment for.
