Percentage of individuals positive in last seven days	7.5%	↑	RED

Bexley COVID-19 Epidemic Curve Based on Specimen Date (Pillars 1 + 2)
 Since 1 September 2020
 (Source: UKHSA Coronavirus Data.GOV.UK)

7-day case rate RAG rating: **RED** if greater than 50 cases per 100,000 per week; **AMBER** if 25-50 cases per 100,000 per week; **GREEN** if less. Positivity RAG rating: **RED** if proportion of people testing positive is greater than 7.5%; **AMBER** if proportion is greater than 4%; **GREEN** if less. Exceedance RAG rating identifies if recent numbers of COVID-19 cases are not following the previous temporal trend. A **RED** rating is given if the threshold is exceeded for two or more of the 14 most recent day regardless of the magnitude of the exceedances, OR if the observed count is greater than the forecast mean value for 12 of the 14 most recent days. An **AMBER** rating is given if the threshold is exceeded for only one of the 14 most recent day, OR if the observed count is greater than the forecast mean value for 10 or more of the 14 most recent days. Otherwise a **GREEN** rating is given.
