# Bexley high level summary

High Level Summary Data - Bexley COVID-19 Daily Data Tracker			
Number of cases in last seven days	23		
Seven-day case rate per 100,000 population for Bexley	9.2	↓	
Seven-day case rate per 100,000 population for Dartford (GOV. UK)	9.9	↓	
Cumulative total number of cases (as of 1 <sup>st</sup> June)	89,804		
Cumulative case rate per 100,000 population (as of 1 <sup>st</sup> June)	36,431.6		
Rate of individuals tested in last 7 days per 100,000 population	33.3		
Percentage of individuals positive in last seven days	8.5%	↓	
Situations reported by LCRC	No data		

As of 14<sup>th</sup> July 2022, no routine testing of staff , residents or school students is being undertaken in Bexley, so the previously included slide on these figures has been removed.

7-day case rate RAG rating: **RED** if greater than 50 cases per 100,000 per week; **AMBER** if 25-50 cases per 100,000 per week; **GREEN** if less. Positivity RAG rating: **RED** if proportion of people testing positive is greater than 7.5%; **AMBER** if proportion is greater than 4%; **GREEN** if less. Exceedance RAG rating identifies if recent numbers of COVID-19 cases are not following the previous temporal trend. A **RED** rating is given if the threshold is exceeded for two or more of the 14 most recent day regardless of the magnitude of the exceedances, OR if the observed count is greater than the forecast mean value for 12 of the 14 most recent days. An **AMBER** rating is given if the threshold is exceeded for only one of the 14 most recent day, OR if the observed count is greater than the forecast mean value for 10 or more of the 14 most recent days. Otherwise a **GREEN** rating is given.
